## ABSTRACT OF THE DISCLOSURE

Disclosed are an image processing
apparatus and an image processing method capable of
changing a quality of audio data according to a

5 degree of significance of an image. The image
processing apparatus includes an image encoding unit
for encoding image data inputted, an audio data
encoding unit for encoding audio data inputted
together with the image data, a significant scene

10 setting unit for setting to encode a part of region
of the image with a high image quality, and an audio
data encoding setting unit for setting to process the
audio data with a high quality in accordance with the
setting by the significant scene setting unit.
